

Malt Barley and Feed Barley Prices: Golden Triangle Region, MT and Alberta

Last Update: **19-Oct-07** (Updated Weekly)

The following graphs show the prices for malt and feed barley in the Golden Triangle Region[1], Montana, and Red Deer, Alberta.

[1] The “Golden Triangle” spans Montana from Conrad to Shelby in the north and down to Great Falls. In that upside-down triangle sits the state’s greatest wheat growing region.

Sources:

CWB PRO: www.cwb.ca PRO minus AB deduction (elevation, freight, dockage) for desig. barley (\$54.58/T) at Red Deer.

AB cash prices: Average of local feedlot and feed mill prices surveyed weekly by Alberta Grain Commission.

MT cash prices: USDA Montana Cash Prices available at: [Montana Wheat and Barley Committee](http://MontanaWheatandBarleyCommittee.com)

Further Information:**Location:**

The specified locations are reasonable for comparison with similar access to malt plants and freight to port costs, which are the main drivers for malt barley prices. Most malt barley in Alberta is grown in the [black soil zones](#) such as in the Red Deer region. This region is also the main feed surplus area for the province, and thus farm decisions (e.g. growing malt barley or feed barley) are most significant in this area

Malt Barley Grades: US 1 Malt Barley
